

e-Training

& virtual instructor led training (vILT)

Technology today allows for professionals from around the world to benefit from convenient and cost-effective online learning experiences like e-Training and vILT.

These modalities incorporate expert content, interactive exercises and engaging instruction without ever having to leave the comfort of home.

e-Training

&

vILT

Self-paced, online learning experience that provides the opportunity to work with peers and instructors through digital message boards and emails.

Synchronous, virtual learning that provides real-time interaction with instructors and class participants—essentially, a classroom experience from a remote location.

Flexible

Seamless

Online modules to watch on demand

Instructor-led, live, interactive online training

42 days of access to modules and exams to train at a comfortable pace

Access to recorded courses for up to one year after completing training

The fastest and most cost-effective way to complete training and get certified

Direct communication with instructors via email

Real-time communication with instructors and other students via microphone and text-chat

Access from anywhere in the world

Sample assignments, progress assessments and case studies

Offline exercises and reference materials to help prepare for the exam

High-quality training ensuring a consistently exceptional experience for every student in every class

Online message boards to collaborate with other students

Virtual breakout rooms for group exercises

Courses can be applied toward a number of certificates from Strategy Execution and its university partners.
